PRODUCT DATA SHEET

9006 In-Line Flow Indicator

Fluid Power's 9006 In-Line Flow Indicator is designed to provide precise verification of oxygen flow in passenger mask deployment systems or any low flow application requiring an added element of safety.

Flow of oxygen as low as 0.15 LPM is demonstrated by movement of a green indicator into the central viewing sight.

Connector body is made from durable 6061-T6 aluminum alloy with an anodized Type 2 green finish per MIL-A-8625 and provides triple barbed connections for use with 1/4" ID flexible tubing.

Each unit is operationally tested.
Maximum pressure differential 3 PSI
@ 2 LPM flow rate.
